Information assurance army training answers

To meet the requirements described in policies such as the DoD 8570.01M Information Assurance Workforce Improvement Program (WIP), of 10 November 2015, incorporating Change 4; Office of Administration and Circular Budget NO. A-130; and the federal Information Security Modernization Act (FISMA) of 2014, the Defense Information Systems Agency (DISA) develops, maintains and publishes annually the Department of Defense Chief Information Office (DoD CIO) sponsored cyber awareness challenge course. The content of the course is based on the requirements addressed in these policies and the community contribution of the Cyberspace Advisory Group chaired by DoD CIO (CWAG). The course provides an overview of cybersecurity threats and best practices to keep information and information systems secure. Every year, authorized users of DoD information systems must complete the Cyber Awareness Challenge to maintain awareness and keep up to date with new cybersecurity threats. The training also strengthens best practices to keep the DOD and personal information and information systems secure, and be aware of changes in DOD cybersecurity policies. Other agencies use the course to meet their needs too. A Knowledge Check option is also available within the course for people who have successfully completed the previous version of the course. A random selection of Knowledge Check questions derived from the previous version are presented at the beginning of each lesson. Answering these questions correctly results in the ability to dispense with a particular lesson. Instructions for this option are included within the course. English (United Kingdom) English (United States) Spanish (Latinoamérica) Thank you for using our services. We are a non-profit group that runs this document sharing service. We need your help in maintaining and improving this website. To keep our site running, we need your help to cover our server cost (around \$500/m), a small donation will help us a lot.
